

## How to make a Guitar

With a bit of imagination, you can turn almost anything into a musical instrument!

### You Will Need

a box  
pencil  
paints & brush  
6 elastic bands  
ribbon  
tape  
scissors

### Instructions

1. Draw a circle on one side of your box, and cut out using scissors. (To make a neat circle shape you could use the rim of a beaker or bowl to draw around.)
2. Decorate the box with paint.
3. When dry, wrap the elastic bands around the box so that they sit over the hole you have made. Put tape along both sides of the box, to hold the elastic bands in place.
4. Finally, attach your length of ribbon to either side of the top of your box to make a strap. The strap allows your hands to be free and ready for strumming!
